

Business Lines

The reliability you expect from your telecom provider.

A Traditional Telephone Line Product

Datavo Business Lines offer reliable and economical local and long distance phone service designed to meet the needs of your business. Our business lines are proven dependable whether used for faxing, alarms or connected to any device within your business. Datavo's state-of-the-art phone network provides unmatched clarity and reliability. Stay connected with our business lines and local phone service, backed by 17 years of experience.

Most importantly, Datavo's voice services are provided over a dedicated network - not over the internet. Our voice services are digitally uncompressed to provide the best voice quality. We are able to ensure quality and reliability by transporting calls over our dedicated network and not through the use of VoIP technology.

We are able to support single or multi-phone line configurations:

- Comprehensive menu of calling features available such as Call Waiting, Call Forwarding, Caller ID and more.
- Superior quality with 99.9% reliability on local and long distance calls.
- Can be connected directly to a phone set or into your phone system, key system or PBX.
- Keep your existing telephone numbers when converting your services to Datavo.
- Use your business line for telephone calls, fax service, or connecting to the internet.
- Full service customer support that delivers the day-to-day support you need for reliable around-the-clock operations.
